Hopkins Couty Courhouse

118 Church st

Sulphur Springs, TX 75482

New Underground installation and Overhead installation at County Road 2307.

Project WO Number: 26981359

Oncor Electric Delivery LLC., is requesting permission to open cut County Road 2307 to install at approx. 45 deg angle approx. 30 ft of 2 x 6" PVC pipes which will be concrete encased, then 20 ft of 2x 6" concrete encase PVC Pipe parallel to the road to an replacement wooden pole in ROW. Please see attached map for details on this. Oncor will ensure the road is restored to the same condition it currently is, as well as provide proper traffic control and a steel plate which cars can drive on top of the trench to ensure access to the road is available. Total time to install facilities and restore the road should be 4 days. And road will stay drivable throughout these 4 days. This project is to decommission the existing Martin Springs Substation and transfer load to the new Jennings Lake Substation to ensure future capacity for the developing Hopkins county area. Hopkins has originally approved this permit request, and we needed to change things slightly to avoid homeowners drive way.

Site construction work prints are seen below.

If there are any questions or concerns please contact me at your availability.

Hopkins County Courthouse
118 Church St.
Sulphur Springs, TX 75482

Greetings,

Oncor Electric Delivery is requesting permission to construct electric distribution facilities along CR 3562.

Construction prints are attached and all facilities meet clearance requirements of 22 ft.

Scope of Work: install new pole on the East side of CR 3562, slack primary across the road to a pole on private property. The rest of the work will be on private property.

Should you need anything further, please do not hesitate to contact me.

Best regards,

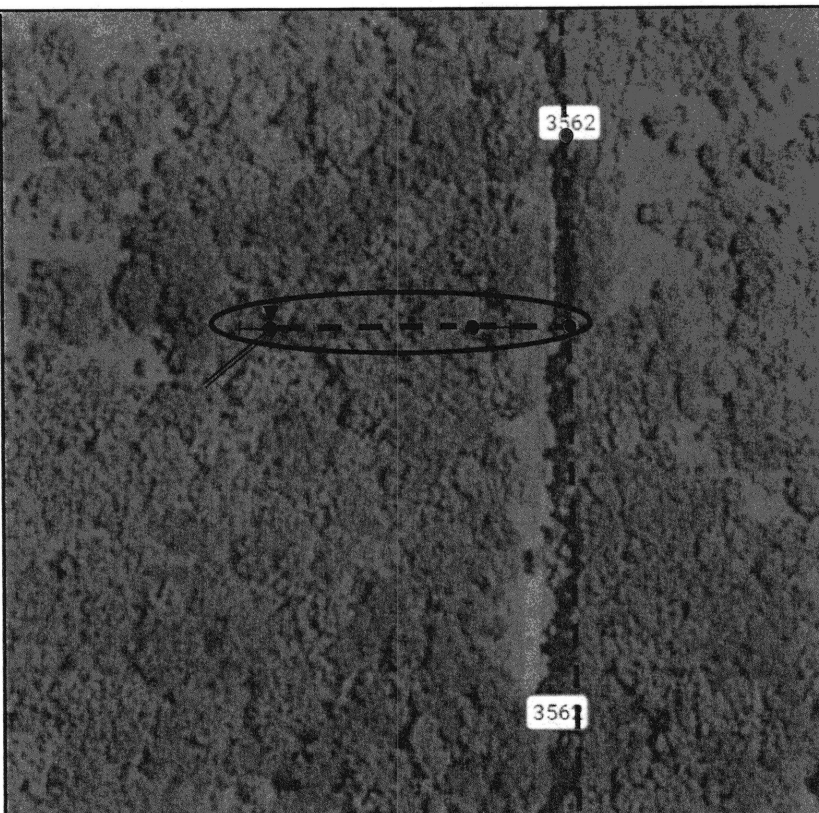

David Caceres
Designer
